APEX HEALTH REGIONAL NETWORK

REQUEST FOR PROPOSAL: ENTERPRISE DUAL-TRANSPORT SD-WAN & 10G OPTICAL WA

SECTION 1: EXECUTIVE SUMMARY & ARCHITECTURAL MANDATES

Apex Health Regional Network ('Apex Health'), headquartered at 1201 Third Ave, Seattle, WA, operates 45 clinical, surgical, oncology, and hospital facilities across Washington, Oregon, Idaho, and Northern California. Apex Health is issuing RFP #AH-2026-SDWAN-094 to select a single Tier-1 Telecommunications and Managed Network Service Provider for a 36-month contract term.

CRITICAL CLINICAL DRIVER: Apex Health has consolidated all real-time Epic Hyperspace Electronic Health Record (EHR) transactions, PACS high-resolution DICOM medical imaging, and Tele-ICU robotics into our Primary Data Center Enclave in Quincy, WA and our Disaster Recovery Cloud Enclave in Google Cloud (us-west1). Legacy best-effort WAN circuits at rural clinics (specifically Site #28 in Wenatchee, WA and Site #33 in Hood River, OR) currently suffer 19ms-22ms round-trip latency and intermittent packet loss, degrading clinician workstation responsiveness.

1.1 Mandatory Technical & Commercial Requirements Summary

1. 45-Site Optical & SD-WAN Footprint: Provision dedicated 10Gbps Optical Wavelength primary circuits plus diverse active/active Managed SD-WAN secondary transport across all 45 clinics listed in Schedule A.

2. Multi-Cloud & Epic EHR Core Interconnects: Deliver 2x 100Gbps Redundant Google Cloud Dedicated Interconnects (Seattle & Portland) and direct optical wave peering into the Quincy, WA Epic EHR Primary Enclave.

3. Strict <12.0ms Latency SLA & Penalty Clause: Round-Trip Delay (RTD) between ANY of the 45 clinics and the Primary Epic EHR Data Center MUST NOT exceed 12.0 milliseconds (95th percentile over 5-minute intervals). Exceedances trigger an automatic 15% Monthly Recurring Charge (MRC) credit per 1.0ms over 12.0ms, with immediate termination-for-cause rights above 18.0ms.

4. Five-Nines (99.999%) Site Availability SLA: End-to-end site availability must achieve >=99.999% (<26 seconds unscheduled downtime per month) with <50ms core optical protection switching and <45ms BFD routing failover.

5. Stringent Healthcare Security & HIPAA BAA: Full FIPS 140-3 Level 3 AES-256-GCM encryption, IEEE 802.1AE MACsec optical encryption, HITRUST CSF v11 r2 certification, and unconditional execution of the Apex Health HIPAA/HITECH Business Associate Agreement (BAA).

6. Zero Upfront Construction NRE Preference: Bidders are strongly advised to absorb or amortize any last-mile lateral fiber construction CAPEX (such as Near-Net extensions at Site #28 Wenatchee and Site #33 Hood River) across the 36-month contract term.

7. 200-Question Vendor Security & Architecture Compliance Matrix: Bidders must complete all 200 mandatory compliance items across Security (SEC), Network (NET), Cloud (CLD), SLA, and Operations (OPS).

SECTION 2: SLA PENALTY SCHEDULE & LIQUIDATED CREDITS

Section 2.1 - <12.0ms Epic EHR Latency Covenant: Because sub-12ms latency is mandatory for Citrix/Epic Hyperspace session stability and real-time surgical telemetry, Provider agrees to continuous 1-second TWAMP/Y.1731 synthetic monitoring from all 45 clinics to POP-QCY-01 (Quincy Epic EHR Gateway) and POP-SEA-01 (Seattle GCP Interconnect). For every 1.0ms above 12.0ms RTD, Apex Health shall receive a 15% MRC service credit for the affected clinic. If any clinic exceeds 18.0ms for three (3) consecutive calendar days, Apex Health may terminate the affected circuit without Early Termination Fees (ETF).

Section 2.2 - Custom BGP & Sub-Second BFD Routing Requirement (See Question Q-052): Provider must support custom

BGP extended community string tagging (65001:100 through 65001:450) with hardware-assisted BFD timers (3x 15ms = 45ms detection) and custom AS-path prepending directly into customer-managed Epic EHR VRFs.

SCHEDULE A: MANDATORY 45 CLINIC SITE LOCATIONS & LATENCY TARGETS

Bidders must validate physical fiber availability, nearest splice closure distance, and projected round-trip latency to the Epic EHR Enclave for each of the 45 Apex Health facilities below. Note that Site #28 (Wenatchee, WA) and Site #33 (Hood River, OR) currently lack in-building fiber risers and require lateral outside-plant (OSP) fiber extensions from nearby utility vaults.

Site ID	Facility Name	Street Address, City, State	Nearest PoP	Max EHR Latency

SCHEDULE B: 200-QUESTION COMPLIANCE MATRIX EXCERPT (KEY MANDATES)

The complete 200-question compliance matrix is structured across five functional domains: Security & HIPAA Compliance (Q-001 to Q-045), Network & SD-WAN Architecture (Q-046 to Q-095), Cloud & Epic EHR Interconnect (Q-096 to Q-135), Service Level Agreements & Penalties (Q-136 to Q-170), and 24x7 Healthcare NOC & Operations (Q-171 to Q-200). Selected high-priority questions include:

Q-001 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-001 - Encryption in Transit for ePHI] Confirm that all ePHI traffic traversing SD-WAN overlays and optical wavelengths uses FIPS 140-3 validated AES-256-GCM encryption at line rate. (Applicable across all 45 sites including Apex Health Northgate Diagnostic Imaging Center in Seattle, WA).

Q-002 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-002 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Bellevue Overlake Heart & Vascular Institute in Bellevue, WA).

Q-003 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-003 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Issaquah Highlands Surgical Center in Issaquah, WA).

Q-004 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-004 - Zero-Trust Micro-Segmentation for Clinical VLANs] Verify support for VRF-aware zone-based firewalls isolating Epic EHR workstations, PACS medical imaging, guest Wi-Fi, and infusion-pump IoT VLANs. (Applicable across all 45 sites including Apex Health Tacoma Commencement Bay Medical Center in Tacoma, WA).

Q-005 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-005 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health Olympia Capitol Medical Pavilion in Olympia, WA).

Q-006 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-006 - Encryption in Transit for ePHI] Confirm that all ePHI traffic traversing SD-WAN overlays and optical wavelengths uses FIPS 140-3 validated AES-256-GCM encryption at line rate. (Applicable across all 45 sites including Apex Health Mount Vernon Skagit Valley Clinic in Mount Vernon, WA).

Q-007 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-007 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Spokane Valley Veradale Specialty Center in Spokane Valley, WA).

Q-008 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-008 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Kennewick Columbia Center Clinic in Kennewick, WA).

Q-009 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-009 - Zero-Trust Micro-Segmentation for Clinical VLANs] Verify support for VRF-aware zone-based firewalls isolating Epic EHR workstations, PACS medical imaging, guest Wi-Fi, and infusion-pump IoT VLANs. (Applicable across all 45

sites including Apex Health Wenatchee Valley Specialty Clinic in Wenatchee, WA).

Q-010 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-010 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health Portland South Waterfront Genomics Center in Portland, OR).

Q-011 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-011 - Encryption in Transit for ePHI] Confirm that all ePHI traffic traversing SD-WAN overlays and optical wavelengths uses FIPS 140-3 validated AES-256-GCM encryption at line rate. (Applicable across all 45 sites including Apex Health Hillsboro Silicon Forest Medical Pavilion in Hillsboro, OR).

Q-012 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-012 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Corvallis Willamette Research Clinic in Corvallis, OR).

Q-013 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-013 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Medford Rogue Valley Oncology & Surgery in Medford, OR).

Q-014 [SEC - HIPAA & Zero-Trust Encryption]

Does the provider allow Apex Health's internal SOC to hold exclusive customer-managed HSM root keys (BYOK/HYOK) for SD-WAN control-plane IPsec re-keying on a 15-minute rotation interval?

Q-015 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-015 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health First Hill Flagship Medical Center in Seattle, WA).

Q-016 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-016 - Encryption in Transit for ePHI] Confirm that all ePHI traffic traversing SD-WAN overlays and optical wavelengths uses FIPS 140-3 validated AES-256-GCM encryption at line rate. (Applicable across all 45 sites including Apex Health Northgate Diagnostic Imaging Center in Seattle, WA).

Q-017 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-017 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Bellevue Overlake Heart & Vascular Institute in Bellevue, WA).

Q-018 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-018 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Issaquah Highlands Surgical Center in Issaquah, WA).

Q-019 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-019 - Zero-Trust Micro-Segmentation for Clinical VLANs] Verify support for VRF-aware zone-based firewalls isolating Epic EHR workstations, PACS medical imaging, guest Wi-Fi, and infusion-pump IoT VLANs. (Applicable across all 45 sites including Apex Health Tacoma Commencement Bay Medical Center in Tacoma, WA).

Q-020 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-020 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health Olympia Capitol Medical Pavilion in Olympia, WA).

Q-021 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-021 - Encryption in Transit for ePHI] Confirm that all ePHI traffic traversing SD-WAN overlays and optical wavelengths uses FIPS 140-3 validated AES-256-GCM encryption at line rate. (Applicable across all 45 sites including Apex Health Mount Vernon Skagit Valley Clinic in Mount Vernon, WA).

Q-022 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-022 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Spokane Valley Veradale Specialty Center in Spokane Valley, WA).

Q-023 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-023 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Kennewick Columbia Center Clinic in Kennewick, WA).

Q-024 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-024 - Zero-Trust Micro-Segmentation for Clinical VLANs] Verify support for VRF-aware zone-based firewalls isolating Epic EHR workstations, PACS medical imaging, guest Wi-Fi, and infusion-pump IoT VLANs. (Applicable across all 45 sites including Apex Health Wenatchee Valley Specialty Clinic in Wenatchee, WA).

Q-025 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-025 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health Portland South Waterfront Genomics Center in Portland, OR).

Q-026 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-026 - Encryption in Transit for ePHI] Confirm that all ePHI traffic traversing SD-WAN overlays and optical wavelengths uses FIPS 140-3 validated AES-256-GCM encryption at line rate. (Applicable across all 45 sites including Apex Health Hillsboro Silicon Forest Medical Pavilion in Hillsboro, OR).

Q-027 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-027 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Corvallis Willamette Research Clinic in Corvallis, OR).

Q-028 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-028 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Medford Rogue Valley Oncology & Surgery in Medford, OR).

Q-029 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-029 - Zero-Trust Micro-Segmentation for Clinical VLANs] Verify support for VRF-aware zone-based firewalls isolating Epic EHR workstations, PACS medical imaging, guest Wi-Fi, and infusion-pump IoT VLANs. (Applicable across all 45 sites including Apex Health Nampa Canyon County Family Clinic in Nampa, ID).

Q-030 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-030 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health First Hill Flagship Medical Center in Seattle, WA).

Q-031 [SEC - HIPAA & Zero-Trust Encryption]

Will the vendor accept unlimited third-party penetration testing against live production CPE management interfaces without a 7-day advance maintenance window notice?

Q-032 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-032 - HIPAA Business Associate Agreement (BAA)] Confirm readiness to execute the standard Apex Health HIPAA/HITECH Business Associate Agreement without material redlines. (Applicable across all 45 sites including Apex Health Bellevue Overlake Heart & Vascular Institute in Bellevue, WA).

Q-033 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-033 - HITRUST CSF v11 & ISO/IEC 27001 Certification] Provide current HITRUST CSF v11 r2 and ISO/IEC 27001:2022 certification scope covering all Pacific Northwest PoPs and NOC centers. (Applicable across all 45 sites including Apex Health Issaquah Highlands Surgical Center in Issaquah, WA).

Q-034 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-034 - Zero-Trust Micro-Segmentation for Clinical VLANs] Verify support for VRF-aware zone-based firewalls isolating Epic EHR workstations, PACS medical imaging, guest Wi-Fi, and infusion-pump IoT VLANs. (Applicable across all 45 sites including Apex Health Tacoma Commencement Bay Medical Center in Tacoma, WA).

Q-035 [SEC - HIPAA & Zero-Trust Encryption]

[RFP-SEC-035 - SOC 2 Type II Continuous Compliance] Confirm AICPA SOC 2 Type II attestation across all 5 Trust Services Criteria with zero open high-severity exceptions. (Applicable across all 45 sites including Apex Health Olympia Capitol Medical Pavilion in Olympia, WA).
